EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leighton Chong on 05/26/05.

The application has been amended as follows:

In Figure 2, the teeth have been added to members E and F as a schematic representation in order to comply with 37 CFR 1.83(a).

2. The following is an examiner's statement of reasons for allowance: The claim is allowable because the prior art fails to teach a driven cog attached on the surface of a second semi-spherical or elliptical part where a pivot is placed and the driven cog (teeth) is engaged with a large fan-shaped cog (teeth) coupled to a second operating lever as set forth in claim 8.

C. H. Boyle (1,592,073) teaches a first semi-spherical part 15, a hollowed-out circular hole (see Fig. 3), blades 21, a second semi-spherical part 14, means for mounting the second part/pivot pins 18, a first operating lever 13 and a second operating lever 12. However, C. H. Boyle fails to teach the driven cog attached on the surface of the second semi-spherical or elliptical part where the pivot is placed and the driven cog (teeth) is engaged with the large fan-shaped cog (teeth) coupled to the second operating lever as set forth in claim 8.
